EDUCATION

Bachelor of Digital Design

RMIT University, Melbourne.

July 2024 - Present

SKILLS

Product design

Figma, UI design, Wireframing, Interactive prototyping

Research & testing

User research, Interviews, Usability testing

Front-end development

HTML, CSS, JavaScript, GitHub

Visual design

Photoshop, Illustrator

LANGUAGES

Mandarin, Cantonese

SELECTED PROJECTS

DoItNow

2025 / Individual course project / Figma prototype

Designed a Figma planning prototype informed by one student interview and qualitative usability feedback. Kept suggested task plans editable and revised the heatmap layout and progress contrast.

Mapped in Memory

2025 / Four-person course project / AR concept

Contributed creative technology research, supporting narrative and UI/UX in a four-person team. Connected maps, AR missions and collectible story fragments in a proposed Chinatown visitor journey.

Concept walkthrough

Watching the Wait

2026 / Independent course project / Live web narrative

Independently designed, developed and deployed a scroll-based narrative about delivery tracking. Coordinated interface states, rider movement, ETA, motion and optional sound using HTML, CSS and JavaScript.

Live project

Lucky Scratch

2025 / Individual course project / Live web experiment

Built a browser experience around selecting, flipping and scratching cards to reveal encouraging messages. Connected each action with sound feedback using HTML, CSS and JavaScript.

Live project
