PROFILE SUMMARY

UI/UX designer creating clear, user-centred experiences across mobile and web. Works in Figma from wireframes to interactive prototypes, using research and testing to guide design decisions. Brings an understanding of HTML, CSS and JavaScript, keeping both usability and implementation in mind.

EDUCATION

July 2024 – Present

Bachelor of Digital Design

RMIT University, Melbourne

SKILLS

Product Design

Figma, UI design, wireframing, interactive prototyping

Research & Testing

User research, interviews, usability testing

Technical

HTML, CSS, JavaScript, GitHub

Visual Design

Photoshop, Illustrator

LANGUAGES

Mandarin

Cantonese

PROJECTS

DoItNow

Mobile Product Design | Figma | 2025

Designed and iterated on an interactive prototype for an AI-assisted mobile productivity app. Conducted user interviews and usability tests to assess feature clarity and interaction, then refined visual hierarchy, heatmap contrast and touch targets based on feedback.

Watching the Wait

Interactive Web Experience | 2026 | Live site

Independently designed, developed and deployed a scroll-based experience exploring how delivery tracking shapes the perception of waiting. Built with HTML, CSS and JavaScript, it synchronises changing ETAs, interface states, animation, colour and sound.

Mapped in Memory

Collaborative AR App Concept | Team Project | 2025

Collaborated in a four-person team to turn research into a location-based AR storytelling concept for Melbourne's Chinatown. Contributed to narrative development and UI/UX design, co-creating interface mockups and a video walkthrough to communicate the proposed user journey.

Community - Food Court Icons

Icon System | Visual Design | 2024 | Live site

Designed nine food-court icons exploring community and shared public space, using a consistent visual language across form and colour. Extended the system into a web presentation with hover, click and sound feedback.
